FREELANCE EXPERIENCE

Full Stack Developer

BETASQUIRREL CRM Project—2023

Designed and developed CRM features with React.js for frontend and Node.js backend.

Built reusable React components with state management.

Developed secure login, lead management, and dashboard views.

Integrated APIs and managed database with MySQL.

SOCIAL CONNECT – Social Media Platform

Developed a social media platform to help users find project teammates based on skill and mindset alignment.

Enabled users to post challenges or join others in team or individual competitions based on their talents.

Built scalable API architecture and real-time features like team invites, challenge feed, and profile matching.

Deployed the full application on AWS for high availability and scalability.

TECSHIFT – Event Management System

Technologies: Laravel, JavaScript, MySQL, Livewire, Postman, Bitbucket

Developed admin tools for registration approval, QR check-ins, and attendance tracking.

Integrated automated email and printable QR code generation.

Created a dynamic event dashboard and participant reports.
